

Cultural Day

Cultural day was introduced to teach students about other countries and cultures. Each year for one day, 6 countries get presented. Every year the countries presented change, so that by 8th grade, student's would have learnt about 60 countries. Parents/grandparents, community friends or students choose a country and put together a tri-fold board and cultural table and carry out a short presentation to each class of students. Each presentation is tailored to the ages of the students during each time slot. As well as a presentation, students may get to do an art activity, spice painting, try traditional food or even traditional dancing. Each student has a paper passport and gets a stamp after visiting each country. In effect they get to travel around the world for one day.
